

QUICK START

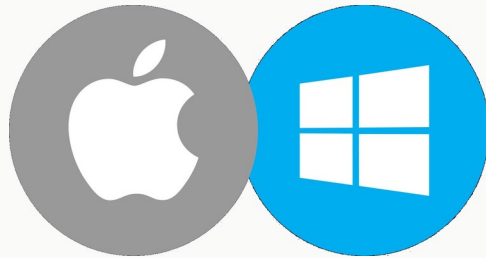

# Present with confidence.

Five steps. First service. No stress.

STEP 01

## Connect Your Display

Plug in your projector or secondary screen prior to installing PresenterBuddy. Ensure that you can present using Melodie or PowerPoint for the most seamless installation.

STEP 02

## Download & Install

Go to [worshipbuddy.org/presenter-buddy](http://worshipbuddy.org/presenter-buddy) and download for either macOS or Windows. Run the installer following the on-screen prompts. For Windows, click "Run Anyway" if Microsoft Defender SmartScreen issues an *unrecognized app* warning.

STEP 03

## Enter Your Songbook ID

On first launch, enter the Songbook ID to access your church's song library. If you are using WorshipBuddy, it is the same Songbook ID found in the settings page. It follows this format **ABC123**.

### Connect your Songbook

Enter the SongbookID provided by your WorshipBuddy administrator to load your church's song library.

Connected: ●●●●●● Change Remove

DATABASE

Update Database Reset Databases Import Database Export Database

STEP 04

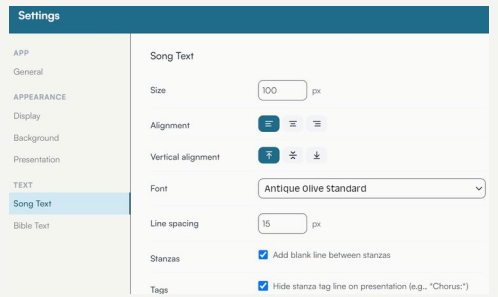

## Update / Import Database

Go to Settings > General. Under the Database section, click Update Database to ensure that you have the latest songs from your church. Import additional songs using the Import Database tool.

STEP 05

## Adjust Display Settings and Present

Go to Settings > Text and adjust Bible and Song fonts, sizing, alignment and line spacing. PresenterBuddy saves your settings for every service even after receiving over-the-air updates. Start presenting with confidence with PresenterBuddy.
